PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate (Anna University, 2025) with strong analytical skills, hands-on experience in **machine learning, image processing, and data quality workflows**. Experienced in processing and validating structured and unstructured datasets including **text, image, and audio data** through academic projects and internships. Proficient in Python-based data pipelines, data annotation concepts, and quality verification practices. Fluent in English with excellent written and verbal communication skills. Familiar with **Microsoft Office** (Word, Excel, PowerPoint) and committed to maintaining high productivity and quality standards in fast-paced, target-driven environments.

CORE COMPETENCIES

- ML Data Processing
- Data Annotation & Labelling
- Image & Text Data Handling
- Quality Auditing & Verification
- Data Cleansing & Validation
- Attention to Detail
- English Language Proficiency
- Grammar & Linguistic Accuracy
- Microsoft Office Suite
- Python & Data Libraries
- Productivity & Target Management
- Process Compliance

TECHNICAL SKILLS

Data & ML Tools: Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Jupyter Notebook, Google Colab
Data Types Handled: Text, Image, Audio Feature Datasets, Structured & Unstructured Data
Office & Productivity: MS Word, MS Excel, MS PowerPoint, Google Docs, Google Sheets
Annotation-Adjacent: Data Labelling Concepts, Ground Truth Data, Data Preprocessing, Feature Extraction
Cloud & Platforms: AWS (AI Practitioner), Databricks, Google Cloud
Other Tools: Git, VS Code, MySQL

EDUCATION

Bachelor of Engineering — Computer Science and Engineering	Nov 2021 – May 2025
Anna University Regional Campus, Madurai, India	CGPA: 7.89
Higher Secondary Certificate (HSC) — Science	Jun 2020 – Mar 2021
ADR Matric Higher Secondary School, Pudukkottai, India	92%

INTERNSHIP EXPERIENCE

Data Science Using Python Intern	Apr 2023 – May 2023
Pantech e-Learning	
- Processed and analysed real-world datasets including structured tabular and feature-based data — applying preprocessing, cleaning, and validation steps analogous to ML data annotation workflows. - Performed data quality checks and verification at each pipeline stage to ensure accurate, clean ground truth data suitable for model training. - Documented findings, tracked task completion, and maintained high accuracy standards throughout data processing exercises — directly reflecting ML Data Associate responsibilities. - Applied linguistic and pattern recognition skills to identify and categorise features across datasets, including text and audio-feature data.	
Full Stack Developer Intern	Feb 2024 – Jun 2024
Slash Mark IT Solutions (OPC) Pvt. Ltd (via AICTE)	
- Followed defined procedures, guidelines, and SOPs to develop and test web applications — demonstrating ability to execute repetitive structured tasks with precision and consistency. - Maintained data integrity and quality across MySQL databases through validation, error handling, and compliance with project standards. - Communicated issues, escalated failures, and reported task status accurately to supervisors — reflecting the reporting and escalation skills required in this role.	

KEY PROJECTS

- Applied **image data processing techniques** in Python to convert real photographs into cartoon-style visuals — demonstrating hands-on experience with **visual/image data transformation** directly relevant to Amazon’s computer vision and image annotation workflows.
- Practised precise, rule-based transformation of image files ensuring consistent, high-quality output.

Music Genre Classification

- Processed and categorised **audio feature datasets** using Python — extracting, labelling, and classifying audio patterns, closely mirroring **audio data annotation** tasks in ML pipelines.
- Applied data preprocessing and feature extraction to ensure clean, accurately labelled ground truth data suitable for ML model training.

Diabetes Prediction — ML Pipeline

- Built a supervised ML pipeline handling **data collection, preprocessing, labelling, and model training** — providing strong understanding of how **accurate ground truth data** directly impacts ML model quality and outcomes.
- Performed quality audits at each stage, identifying and correcting data inconsistencies to maintain high standards of data accuracy.

Python Mini Projects (10+)

- Developed modular Python applications demonstrating **consistent adherence to instructions, structured execution, and meeting defined output standards** — skills essential for repetitive, high-quality ML data processing tasks.

CERTIFICATIONS

Apr 2026	AWS AI Practitioner Challenge — Udacity
Mar 2026	Databricks: Build Data Pipelines with Lakeflow Spark Declarative Pipelines
Mar 2026	Databricks: Deploy Workloads with Lakeflow Jobs
Aug 2025	Databricks Fundamentals
Oct 2024	Java Full Stack — Wipro TalentNext
Oct 2023	Cloud Computing Foundations — Google Student Club
2023	Data Science Using Python — Pantech

LANGUAGES

English — Professional Working Proficiency	Tamil — Native / Bilingual	Hindi — Professional Working Proficiency
---	-----------------------------------	---

Strong command of English grammar, syntax, and linguistic rules — with experience applying language accuracy standards in academic writing, documentation, and technical reporting throughout internships and projects.
